Fiduciary Management, Inc. has been independently verified for the periods 12/31/1993 - 12/31/2022. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. FMI was founded in 1980 and is an independent investment counseling firm registered with the SEC and the State of Wisconsin. The firm manages over \$13.0 billion in assets of pension and profit sharing trusts, mutual funds, Taft-Hartley funds, insurance company portfolios, endowments and personal trusts. The firm includes both institutional and mutual fund business. Although the firm has participated in wrap programs, it is a separate and distinct business, and is excluded from firm-wide assets.

The Focused Global Equity Composite was created and inception on 05/18/2013. This composite invests mainly in a limited number (usually between 10-20) of mid- capitalization (namely, companies with more than \$5 billion market capitalization) U.S. and foreign companies. Currency exposure is not hedged.

The Focused Global Equity Composite reflects time-weighted and asset-weighted returns for all discretionary accounts. All returns are calculated using United States Dollars and are based on monthly valuations using trade date accounting. All accounts in this composite are fee paying. Gross of fees returns are calculated gross of management fees, gross of custodial fees, gross of withholding taxes and net of transaction costs. Net of fees returns are calculated net of actual management fees and transaction costs and gross of custodial fees and withholding taxes. Dispersion is calculated using the equal weighted standard deviation of all accounts in the composite for the entire period. Dispersion is not shown when there are five or fewer accounts in the composite for the year. As of 12/31/2011, the trailing three year annualized ex-post standard deviation for the Composite and Benchmark are required to be stated per GIPS®. FMI uses gross returns to calculate these.

Currently, the advisory fee structure for the Focused Global Equity Composite portfolios is as follows:

Up to \$25,000,000	0.65%
\$25,000,001-\$50,000,000	0.60%
\$50,000,001-\$100,000,000	0.55%
\$100,000,001 and above	0.50%

The firm generally requires a minimum of \$10 million in assets to establish a discretionary account. The minimum account sizes do not apply to new accounts for which there is a corporate, family, or other substantial relationship to existing accounts. In addition, the firm reserves the right to waive the minimum account size and minimum annual fee under certain circumstances. A complete list and description of all firm composites and FMI distributed mutual funds are available upon request. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

The iShares MSCI World ETF objective is to provide investors with a total return, taking into account both capital and income returns, which reflects the return of the MSCI World Index®. The investment policy of the ETF is to invest in a portfolio of equity securities that as far as possible and practicable consist of the component securities of the MSCI World Index, this Fund's Benchmark Index. The ETF intends to use optimization techniques in order to achieve a similar return to the Benchmark Index and it is therefore not expected that the Fund will hold each and every underlying constituent of the Benchmark Index at all times or hold them in the same proportion as their weightings in the Benchmark Index. The ETF may hold some securities which are not underlying constituents of the Benchmark Index where such securities provide similar performance (with matching risk profile) to certain securities that make up the Benchmark Index. However, from time to time the Fund may hold all constituents of the Benchmark Index. The MSCI World Index® is a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets. The MSCI World Index® consists of the following 23 developed market country indices: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom and the United States. It is reported in USD. The Focused Global Equity composite uses the iShares MSCI World ETF® as its primary benchmark comparison. In September 2022, the benchmark was changed from MSCI World Index® to iShares iShares MSCI World ETF® for all periods.
