Performance data quoted represents past performance; past performance does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance since the above time period may be lower or higher than the performance quoted. The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

As of the Fund's Prospectus dated 1-31-24, the annual operating expense ratio for FMIFX is 0.90%*.

* Note that the annual operating expenses for FMIFX are 1.14% before the investment adviser's voluntary reimbursement such that the annual operating expenses do not exceed 0.90%, which will continue at least through January 31, 2025.

Risks associated with investing in the Fund are: Stock Market Risk, Value Investing Risk, Foreign Securities Risk (fluctuation of currency, different financial standards, and political instability), Geographic Concentration Risk, Large Capitalization Companies Risk, Liquidity Risk, and Tax Law Change Risk.
